**3. Other European Championships 2014.**

**4. EFSA Iceland domestic Championships 2014, Single day Tournament, Shore Championship.**

**5. Other items.**

# **EFSA Species 2014 Ólafsvik 29. - 31. maí 2014**

A few words about the fishing.

The fishing will mainly take place at 50-100 meter depth.  
Anyway we have to be prepared to go deeper if the fish is there.

So bring one heavy and one light rod.

The average size Cod is around 60-70 cm and the pirks that we use most are 200-300 gr. Maximum size Cod will be > 10 kg. Hopfully > 20 kg.

EFSA Iceland will supply Blueeye or similar baite. In case of baitefishing a leadweight of 300-500 gr. will probably be most used. This is of course depending of weather conditions.

Almost certainly the cod will be just above the bottom and few metres up, it is very special if they come higher in water at this time of year.

I would recommend using paternoster as „one up/one down“ will result in catching more other species not counting as ling, tusk, haddock and catfish.

My favorit colors for artificial baite are orange and pink.

**Registration for EFSA species closes at  
January 31. 2014**

**Please register with your section Secretary. [Brochure](#)**

**EFSA íslandi vill minna á skráningu fyrir  
Evrópumótið sem haldið verður í Ólafsvík en  
henni lýkur 31. janúar, skráningu skal komið til  
Þóris Sveinssonar [thosve@snerpa.is](mailto:thosve@snerpa.is)**

**Skráningarblað er að finna í  
[mótsbæklingi](#)**

**EFSA Iceland wishes all EFSA members,  
friends and families a happy new year.**
